

FRM220-CH20 & FRM220-CH08

In-Band Managed
Multi-Service Platform

The FRM220 series is a multi-service chassis platform, which provides a reliable solution of high density media converter modules for applications such as telecom operator, enterprise, long haul transmission and factory automation. All of critical components of FRM220 series chassis solution such as power modules, fans, management module and interface cards are hot swappable, allowing online field replacement.

FRM220 series is offered in two chassis densities, a 2U 20-slot (FRM220-CH20) and a 1U 8-slot (FRM220-CH08).

Common Features

- Supports AC/DC power module hot swappable and power redundancy
- Two alarm relays contact for critical events warning
- All modules and interface cards are hot swappable
- Chassis backplane consists of passive components

Chassis Overview

- **FRM220-CH20** (2U 19" 20 Slots)

- **FRM220-CH08** (1U 19" 8 Slots)

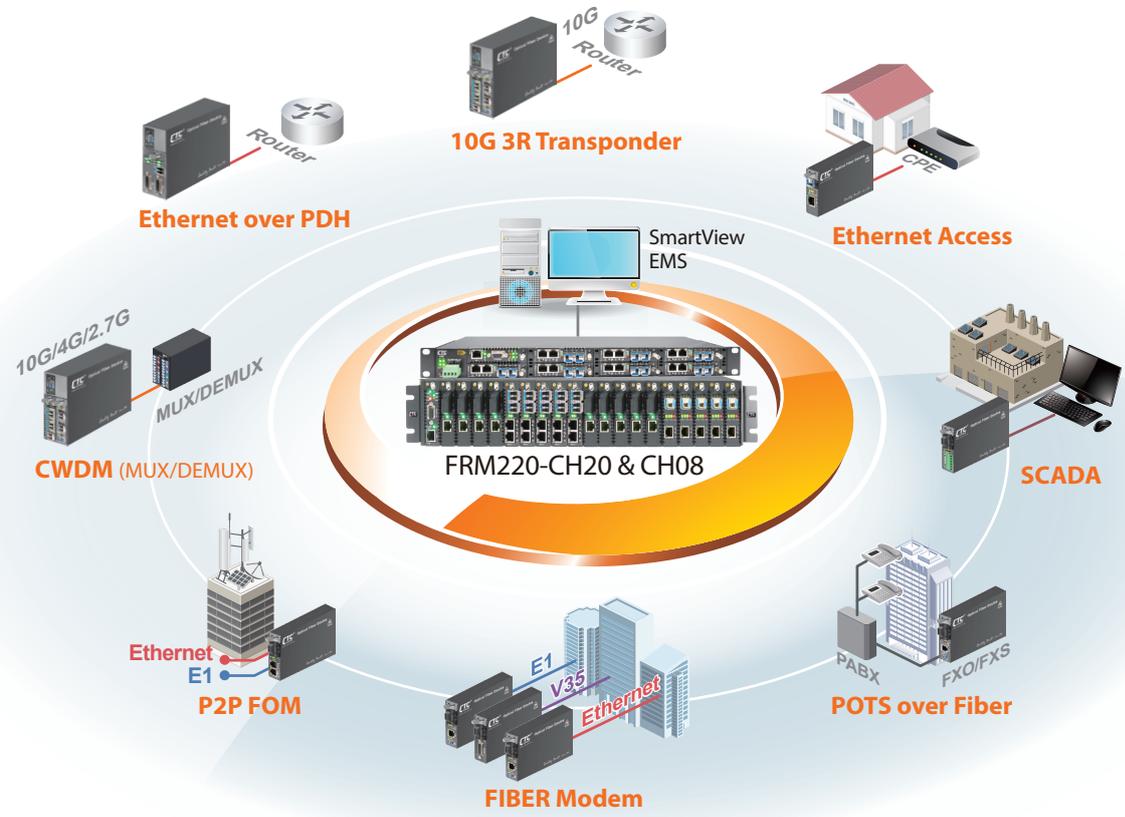

Main Features

• **Module Cards for Deployment Scenarios**

The FRM220-CH20 has been designed as a Multi-service platform. This allows network administrators to deploy the chassis in a wide range of networks.

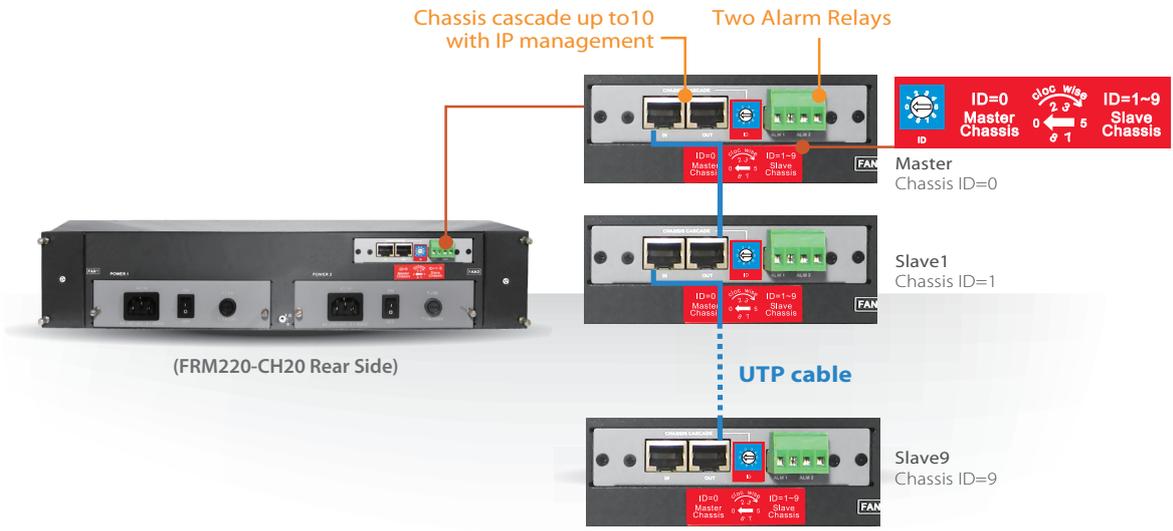

Technologies supported by the chassis include Fast/Gigabit Ethernet, E1/T1, V35/X21/RS-530, Serial RS-485/RS-422, Voice FXO/FXS, Repeater, Fiber Multiplexer, E1 Inverse Multiplexer, CWDM Mux/DeMUX and 10G 3R Transponder

• **Chassis Cascade (FRM220-CH20)**

The FRM220-CH20 Chassis features cascadable management which allows managing a stack (up to 10 chassis) from a single IP address. Chassis are interconnected with standard UTP cables that carry control signals. Each chassis has its own ID, starting with the master chassis ID0 and cascading up to ID9

- Single IP managed chassis with 10 units cascaded max.
- Beneficial to centralizes management in one rack
- Scalability as the demand grows

• Network Management

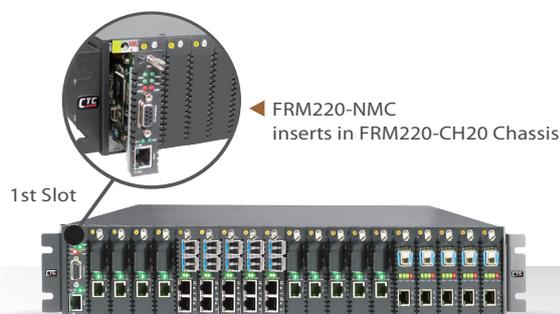

Both FRM220-CH20 and FRM220-CH08 require a NMC (Network Management Controller **FRM220-NMC**) card which must be installed into the first slot of chassis. The NMC card allows a network administrator the ability to configure and monitor the status of the blades. Management can be achieved locally over RS232, or over the network by Telnet, Web or SNMP. If the blades support Ethernet in the First Mile (IEEE 802.3ah), then the management module can also be monitored the status of a remote CPE.

FRM220-NMC

FRM220-NMC Features

- Supports local / remote monitor and configuration
- Supports local / remote online TFTP f/w upgrade
- Fiber transceiver status & info display
- Supports multiple accesses for SNMP management
- Supports Web GUI management, Telnet, Serial console
- Supports console RS-232 port and 10/100Base-T Ethernet port
