ITP-800M-8PH24

8x 10/100Base–T with 8x PoE+ Managed Ethernet Switch

ITP-802GSM-8PH24 series are managed industrial grade gigabit PoE (Power over Ethernet) switches with 8 10/100Base-TX PoE ports and/or 2 Gigabit/Fast Ethernet SFP ports that provide stable and reliable Ethernet transmissions. ITP-802GSM-8PH24 series equipped with PoE feature enable power and data to be transferred via a single cable, hereby considerably reducing cabling expenses. ITP-802GSM-8PH24 series also provides a variety of functions to manage PoE operation including PoE device auto-checking, auto reset, and PoE power weekly scheduling. Other advanced Ethernet functions are supported and include STP/RSTP/MSTP/ ITU-T G.8032 ERPS and multiple μ-Ring for redundant cabling, layer 2 Ethernet IGMP, VLAN, QoS ,Security, IPv6, bandwidth control, port mirroring, cable diagnostic and Green Ethernet.
Housed in rugged DIN rail or wall mountable enclosures, these switches are designed for the harshest environments. Specifically, ITP-802GSM-8PH24 series switches use M12 connectors to ensure water tight, robust connections and to guarantee reliable connections against environmental disturbances, such as vibration and shock. ITP-802GSM-8PH24 series are compliant with EN 50155, covering power input voltage, surge, EFT, ESD, vibration, shock, thus making the switches suitable for industrial applications, such as vehicle, rolling stock, ship, vessel.
ITP-802GSM-8PH24 series are IP67 rated to protect against dust and water submersion. They are particularly used in environments with extreme temperature, high humidity, oil, dust and in outdoor environments requiring water-proof applications such as IP surveillance, city security. ITP-802GSM-8PH24 series can also work with CTC Management platform SmartView™ to provide convenient, real-time and centralized device management.
